- As a group, do the strategic objectives represent every one of the organization's **key strategic focus areas**?
- Are there at least three strategic priorities, but **no more than six**?
- Are the goal descriptions **global in scope** and start with “infinite” verbs?
- If the organization achieves these goals, and only these goals, will the organization most likely have **achieved its vision**?

KEY PERFORMANCE INDICATORS (KPIs)

How will we measure our success?

Definition:

Key Performance Indicators (KPI) are the key measures that will have the most impact in moving your organization forward. We recommend you guide your organization with measures that matter.

Outcome:

5-7 measures that help you keep the pulse on your performance

THE ANATOMY OF A GOOD KPI

Lag/Outcome Measure: (Percentage, Number, Currency or Percent Complete) + (result or outcome)

Lead/Output Measure: (Percentage, Number, Currency or Percent Complete) + (deliverable, activity, process the owner can influence)

Target Structure: (Number for achievement by the end date of the goal)

DEVELOPING MEASURES THAT MATTER

Moving from Outputs to Outcomes:

- What is the result or outcome of achieving the objective?
- Why are we working on this objective?
- How will we know we have accomplished the objective?
- What do we expect to see different as a result of accomplishing this activity/project?

Good Performance Measures:

- Provide a way to see if our strategy is working
- Focus staff's attention on what matters most to success
- Should provide common and understandable language for communicating to others
- Are valid and realistic, to ensure measurement of the right things
- Are verifiable, to ensure accurate data

Tips:

- ✓ People care about **outcomes** not outputs. Think about the **WHY** as you develop measures.
- ✓ Identify your **data source**
- ✓ Focus on **quality over quantity**
- ✓ Staff care about empowerment and seeing **measurable progress**. Shorten timelines where possible.
- ✓ Use a combination of leading (warning buoys) and lagging (history lessons) indicators.
- ✓ Use a proxy or a *qualitative* measure when sourcing the data is harder than doing the work.

TYPES OF MEASURES

QUALITATIVE VS. QUANTITATIVE

Project Measure - Progress against a project or initiative that has a terminus (i.e. stoplight status).

- ✓ Usually % complete

% report developed

Process Measures - Measures activities and processes such as cycle time, frequency, error rate or process-specific metrics.

- ✓ Frequency of events
- ✓ Number of trainings

of sales meetings

BUILDING GREAT MEASURES & TARGETS

Setup: Take a picture of your roadmap and move the 2016 and 2017 sticky notes off to the side. Label the middle column “Measures & Targets” and the far right column “Person Responsible”.

Step 1: Build a grid on the whiteboard/roadmap like the example on the next slide.

Step 2: Develop 1 performance measure for each corporate goal by answering the question “How will we know we are succeeding?” Write each one on a sticky note.

Step 3: Determine if you can gather the data on a monthly basis and what the data source is. Write the data source on the performance measure sticky note.

Step 4: Determine the end of year target by answering the question “What is our desired outcome?” Decide as a group - are we setting moon targets (stretch) or mountain targets (achievable). Write on the sticky note.

Step 5: Identify goal champions or leaders for each goal. Write on sticky note and place in far right column.

Step 6: Repeat steps 2-5 for each goal.

Step 7: Choose 5-7 of the measures you’ve just developed to be KPIs for your organization.
