Last comment: HHS had 120 customer maps that had to be migrated manually into the new environment. We are about 40% completed as I add this comment. This, along with unforeseen time off by current staff, is putting a substantial delay on the project and is pushing out the TSS migration. We have recruited the help of Magus's group to help spend up the map conversion. We are also facing some internal challenges as the tickets we submit are taking two to three weeks to address. Add on the daily keep the lights on requirements; I'm now estimating another month, possibly two months, for completion. I have adjusted the percentage accordingly. (06/23/22)
